## 1. Welcome

Welcome to SPBANKLENS 360 — your enterprise Risk Intelligence and Operations cockpit. This User Manual is your day-to-day reference for using the application across Branch, Regional Office, Central Office and Administrator roles.

SPBANKLENS 360 brings together information from Core Banking, Loan Origination, inspection, legal and recovery sources into a single, role-aware screen — giving every officer a clear, consistent picture of the portfolio, the risk and the next action to take.

**NOTE** SPBANKLENS 360 is a READ-ONLY intelligence platform. It does not post transactions to CBS or LOS. All transactional activity continues to happen in the source systems.

## 2. System Overview

### 2.1 What the Application Does

SPBANKLENS 360 consolidates portfolio, customer, risk, recovery, legal, inspection and compliance information into one operational view. It provides Early Warning Signals (EWS), automated tasks, reminders and supervisory dashboards across the bank's hierarchy.

### 2.2 Who Uses It

- Branch Officers — daily loan, recovery and customer monitoring.
- Branch Managers — supervisory review and task closure.
- Regional Office Users — region-wide branch monitoring and escalation.
- Central Office Users — enterprise oversight, governance and risk.
- Administrators — user, role, threshold and audit administration.

### 2.3 Major Modules

- Branch Dashboard, Regional Dashboard, Central Executive Command Centre.
- Account 360° (CRM-style account deep-dive).
- Knowledge Notebook 2.0 (Operational Memory Layer) and Officer Continuity.
- Workflow Centre with task queues, SLAs and escalation matrix.
- Risk Intelligence (Rule-Based Engine + EWS + Explainable Risk).
- Recovery, NPA Lifecycle, Legal Register, CGTMSE, Inspection / ATR.
- Data Integration Hub (Excel/CSV upload) and Reports / MIS.

### 2.4 Navigation Structure

Every screen uses a consistent enterprise shell: a left sidebar for module navigation, a top bar with global search, notifications and user profile, and a content area that renders the active module. Sub-modules appear as tabs inside their parent screen.

*[ Screenshot placeholder — Application shell — sidebar, top bar, content area ]*

## 3. Getting Started

### 3.1 Accessing the Application

1. Open a supported browser (Chrome, Edge or Firefox, latest version).
2. Navigate to the SPBANKLENS 360 URL provided by your administrator.

### 3.2 Login Process

3. On the Landing Page, choose your role tile (Branch, Regional, Central, Admin).
4. Enter your User ID and password on the role-specific Login screen.
5. Click Sign In to enter the dashboard.

**TIP** Demonstration credentials are shown on each login screen for prototype evaluation. In production, your bank's SSO/AD credentials will be used.

*[ Screenshot placeholder — Landing page with four role tiles ]*

### 3.3 User Roles

Each user is bound to exactly one role at login. The role determines which modules, dashboards and actions are visible. See Section 4 for full role profiles.

### 3.4 Dashboard Overview

Your dashboard is the operational home screen for your role. It shows KPIs, alerts, tasks and quick actions — and is the launching point for every other module.

### 3.5 Logging Out

6. Click your profile icon in the top bar.
7. Select Logout. Your session is securely terminated and you are returned to the Landing Page.

## 4. User Roles

### 4.1 Branch Officer

- Responsibilities: daily loan monitoring, customer interactions, recovery follow-up, notebook updates, task completion.
- Accessible Modules: Branch Dashboard, Account 360, Knowledge Notebook, Workflow Centre, Recovery, Inspection (view), Reports (branch scope).
- Permissions: create/update notebook entries, update assigned tasks, log recovery and customer interactions, upload operational files (where authorised).
- Restrictions: cannot view other branches; cannot configure thresholds, users or roles; cannot close tasks created by others without manager review.

### 4.2 Branch Manager

- Responsibilities: supervisory review of branch portfolio, task closure, officer handover oversight, branch compliance.
- Accessible Modules: all Branch Officer modules + Manager Workbench, Officer Continuity, branch-level Reports/MIS.
- Permissions: close completed tasks, approve escalations to RO, initiate officer handover, sign off inspection ATRs.
- Restrictions: scope limited to the home branch.

### 4.3 Regional Office User

- Responsibilities: monitor all branches in the region, ranking and comparison, escalation tracking, inspection follow-up.
- Accessible Modules: Regional Dashboard, Heat Map, Branch Comparison, Follow-up & Escalation, Regional Recovery, Regional Inspection.
- Permissions: drill into any branch, raise/track escalations, generate regional reports.
- Restrictions: cannot edit branch-level operational records; supervisory access only.

### 4.4 Central Office User

- Responsibilities: enterprise oversight — portfolio, risk, governance, executive reporting.
- Accessible Modules: Executive Command Centre, National Heat Map, Risk Intelligence, Governance, War Room, all Regional/Branch drill-downs.
- Permissions: enterprise-wide view, governance reporting, exception management.
- Restrictions: cannot edit branch operational records or configure security; coordinates with Administrator for configuration.

### 4.5 Administrator

- Responsibilities: user/role administration, threshold/SLA configuration, audit trail review.

- Accessible Modules: Admin Console, User & Role Management, Risk Thresholds & SLAs, Audit Trail, System Settings.
- Permissions: configure all platform-level settings and user accounts.
- Restrictions: no access to operational decisioning; cannot create or close operational tasks.

## 5. Home Dashboard

The dashboard is the role-specific home screen. The widgets below are present (in appropriate variants) across Branch, Regional and Central dashboards.

### 5.1 Portfolio Summary

Purpose: at-a-glance view of sanctioned, outstanding, overdue and recovered amounts for your scope.

How to use: review at the start of the day; compare current values with the previous period trend below the tiles.

Expected result: an immediate picture of book size and movement.

### 5.2 Risk Indicators

Purpose: surfaces the Risk Health Index, EWS counts and SMA/NPA distribution.

How to use: click any indicator to drill into the underlying account list.

Expected result: list of accounts driving the indicator.

### 5.3 Pending Tasks

Purpose: shows tasks assigned to you with due-date and priority cues.

How to use: click a task to open it in the Workflow Centre.

### 5.4 Notifications

Purpose: surfaces system alerts (new escalations, EWS triggers, upload results).

How to use: click the bell icon in the top bar to open the panel.

### 5.5 Upcoming Reviews

Purpose: lists reviews/renewals/inspections falling due in the next reminder window.

### 5.6 Quick Actions

Purpose: one-click access to Add Note, Open Account, Upload File, Generate Report.

### 5.7 Search

Purpose: global search across accounts, customers, branches, officers, notes.

How to use: click the search bar, type at least 3 characters, select a result.

### 5.8 Filters

Purpose: scope the dashboard view by product, sector, period, risk band or branch (for RO/CO).

*[ Screenshot placeholder — Branch Dashboard — KPIs, Risk Health and tasks ]*

## 6. Branch Portal Guide

### 6.1 Opening the Branch Dashboard

8. Log in as Branch Officer or Branch Manager.
9. The Branch Dashboard opens by default. Use the sidebar to revisit it from any other module.

### 6.2 Viewing KPIs

Review the 16 KPI tiles. Hover any tile for the underlying definition; click to drill into the account list.

### 6.3 Monitoring Loans

10. Open Branch > Portfolio.
11. Apply filters (product, sector, SMA bucket, risk band).
12. Sort by Outstanding, DPD or Risk Score to focus attention.

### 6.4 Opening Account 360

Click any account number in any list (or use global search). Account 360 opens with all tabs preloaded.

### 6.5 Completing Tasks

13. Open Workflow Centre > Officer Work Queue.
14. Pick up a task, update status to In Progress, add remarks, save.
15. When done, mark Completed. The Branch Manager will Close after review.

### 6.6 Reviewing Reminders

Open the Reminder Engine panel on the dashboard. Action all 'Due Today' items before end of day.

### 6.7 Accessing Reports

16. Open Reports from the sidebar.
17. Select template, apply filters, and Export to Excel.

**TIP** All exports carry the SPBANKLENS 360 watermark and the developer credit.

## 7. Regional Office Guide

### 7.1 Monitoring Branches

18. Open the Regional Dashboard.
19. Review the Branch Risk Heat Map — Red/Amber/Green bands per branch.
20. Open the branch ranking table to identify outliers.

### 7.2 Portfolio Comparison

21. Open Branch Comparison.
22. Select up to four branches.
23. Compare across portfolio, risk, recovery and compliance KPIs.

### 7.3 Escalation Monitoring

Open Follow-up & Escalation. Review open escalations by age and severity. Reassign or escalate further per the matrix.

### 7.4 Drill-down to Branch Details

From any region-level chart, click a branch to open its Branch Dashboard in supervisory (read-only) mode.

### 7.5 Reports

Generate regional MIS — branch ranking, risk heat, recovery, inspection ATR — and export to Excel.

## 8. Central Office Guide

### 8.1 Enterprise Dashboard

Open the Executive Command Centre. Review the National Health Index, sector concentration and geographic exposure.

### 8.2 Region Heat Maps

Use the National Heat Map to identify high-risk regions. Click any region to drill into its Regional Dashboard.

### 8.3 Portfolio Monitoring

Use the Portfolio Intelligence panel to slice the book by product, sector, vintage and risk band.

### 8.4 Governance Reporting

Open the Governance Index and ATR monitoring tracker. Review the regulatory calendar for upcoming filings.

### 8.5 Executive Analytics

Use the War Room for concentration analytics, large-exposure monitoring and stress scenarios.

## 9. Account 360 Guide

Account 360 is the single screen that consolidates everything known about an account/customer. Each section is a tab inside the same screen.

*[ Screenshot placeholder — Account 360 — header with customer, loan and risk summary ]*

### 9.1 Customer Profile

Shows CIF, name, demographics, contact details, KYC status, and linked relationships.

### 9.2 Loan Details

Shows sanctioned amount, outstanding, interest, EMI, DPD, SMA bucket and repayment schedule.

### 9.3 Risk Summary

Displays the risk dial, EWS triggers and the Explainable Risk panel showing the contribution of each of the 13 rules.

### 9.4 Documentation

Lists all loan documents with status (Available / Pending / Expired) and next renewal date.

### 9.5 Recovery

Shows follow-up history, Promise to Pay records, recovery visits and outcomes.

### 9.6 Legal

Shows notices issued, case forum, advocate, status and next hearing date.

### 9.7 Inspection

Lists past inspections, observations, ATR status and next due date.

### 9.8 Knowledge Notebook

Account-specific notebook — view all structured entries (versioned and immutable).

### 9.9 Attachments

All files attached to notebook entries for this account are listed here for quick reference.

### 9.10 Timeline

A chronological feed of every significant event — uploads, notes, inspections, recovery actions, escalations — for the account.

**EXAMPLE** To find why an account turned amber: open Account 360 → Risk Summary → Explainable Risk panel. The rule with the highest weight contribution is the primary driver.

## 10. Knowledge Notebook

The Knowledge Notebook 2.0 is the bank's permanent Operational Memory Layer. All entries are versioned, attributed, and immutable.

### 10.1 Opening the Notebook

Open Account 360 > Knowledge Notebook tab, or click the notebook icon on any account row.

### 10.2 Adding Operational Notes

24. Click Add Note.
25. Select one of the 10 structured sections.
26. Enter observations, attach evidence, save.

### 10.3 Recording Inspection Visits

Use the Inspection section. Capture visit date, observations, photographs and follow-up actions.

### 10.4 Recording Customer Interactions

Use the Customer Interaction section. Log date, mode (call/visit/meeting), persons met and outcome.

### 10.5 Recording Recovery Activities

Use the Recovery section. Capture visit outcome, Promise to Pay date/amount, next action.

### 10.6 Recording Legal Updates

Use the Legal section. Record notices, hearings and case milestones.

### 10.7 Adding Attachments

Use the attachment control on any note. Attachments are bound to the note version and inherit its audit trail.

### 10.8 Viewing Note History

Open any note to see its complete version history; superseded versions remain visible for audit.

### 10.9 Officer Handover

27. Open Officer Continuity (branch or central).
28. Generate a handover pack — outgoing officer's open tasks, follow-ups and notebook entries are bundled for incoming officer acknowledgement.

## 10.10 Version History

Every save creates a new version. Nothing is ever deleted. This guarantees institutional memory across officer transfers.

**EXAMPLE** After a visit to ABC Traders on 12-Jun: open the account → Add Note → Customer Interaction → record observations and PTP of ₹2,00,000 by 30-Jun → save. The Reminder Engine will auto-create a reminder for 30-Jun.

## 11. Workflow Management

### 11.1 Viewing Tasks

Open Workflow Centre. Use the Officer Work Queue (officers) or Manager Workbench (managers) tab to see your tasks.

### 11.2 Accepting Tasks

29. Click the task to open it.
30. Confirm assignment and click Accept. Status changes to In Progress.

### 11.3 Updating Status

Add remarks at every meaningful step. For recovery and inspection tasks, the system requires a notebook entry before completion.

### 11.4 Closing Tasks

Branch Manager reviews Completed tasks in the Manager Workbench and Closes them. Closed tasks are immutable.

### 11.5 Escalations

Tasks breaching SLA escalate automatically per the Escalation Matrix (Officer → Manager → Regional → Central). Escalated tasks appear on the recipient's dashboard and Follow-up Tracker.

**WARNING** Do not 'Complete' a task without recording the underlying action in the Knowledge Notebook — the audit trail will flag this as an incomplete closure.

## 12. Notifications & Reminders

### 12.1 Dashboard Notifications

The bell icon in the top bar shows new notifications. Click to open the panel; click any item to navigate to the source.

### 12.2 Email Reminders

The Email Automation module (simulated in prototype) dispatches reminders for due tasks, inspections, document expiries, recovery follow-ups and CGTMSE renewals.

### 12.3 Due Dates

Due-Today and Overdue items are highlighted on the dashboard. Clear Due-Today by end of day.

### 12.4 Escalations

Unactioned items escalate per the matrix; recipients see them on their dashboards and Follow-up Tracker.

### 12.5 Acknowledging Alerts

Click Acknowledge on any alert. Acknowledgement is recorded with user, date and time in the audit trail.

## 13. Recovery Module

### 13.1 Viewing Recovery Cases

Open Recovery from the sidebar, or Account 360 > Recovery tab. Filter by branch, bucket or owner.

### 13.2 Recording Visits

31. Open the account.
32. Click Record Visit; enter date, location, persons met, observations.
33. Save — the entry is mirrored to the Knowledge Notebook Recovery section.

### 13.3 Recording Promise to Pay

34. Click Record PTP.
35. Enter PTP amount, date and mode. Save.
36. System creates an automatic reminder for the PTP date.

### 13.4 Scheduling Follow-ups

Use Schedule Follow-up to create the next follow-up task. The task lands in the assignee's Work Queue.

### 13.5 Closing Recovery Actions

On successful recovery or transition to legal action, close the active recovery item. Closure is recorded in the audit trail.

## 14. NPA Module

### 14.1 Monitoring NPA Accounts

Open NPA from the sidebar. Review the NPA ageing summary (SMA-0 to Loss) and the slippage analysis.

### 14.2 Reviewing Status

Drill into any account to view slippage history, provisioning view, recovery actions, legal status and CGTMSE coverage.

### 14.3 Tracking Actions

Record monthly NPA review observations in the Knowledge Notebook. Track upgradation, write-off or recovery actions until closure.

## 15. Legal Module

### 15.1 Viewing Legal Cases

Open Legal Register from the sidebar. Filter by forum (DRT, SARFAESI, Civil), branch or status.

### 15.2 Updating Legal Milestones

Open a case to record notice, possession, auction, decree or recovery certificate milestones.

### 15.3 Tracking Hearings

Record outcome and next hearing date after every hearing. The Reminder Engine surfaces upcoming hearings.

### 15.4 Viewing History

Each case shows a complete versioned history of notices, hearings and milestones — fully audit-trailed.

## **16. CGTMSE Module**

### **16.1 Monitoring Registrations**

Open CGTMSE from the sidebar. Review the coverage status across eligible accounts and identify accounts pending registration.

### **16.2 Tracking Claims**

For invoked accounts, track claim filing, claim ID, claim amount, current status and settlement.

### **16.3 Monitoring Renewals**

Monitor annual guarantee fee renewals. Upcoming renewals appear on the dashboard via the Reminder Engine.

### **16.4 Reports**

Generate CGTMSE coverage, claim status and renewal-due reports. Export to Excel.

## 17. Inspection Module

### 17.1 Recording Inspections

37. Open Inspection from the sidebar.
38. Select inspection type (Statutory, Internal, Concurrent, RBIA, Stock Audit).
39. Record date, scope, observations, risk rating; attach the inspection report.

### 17.2 Action Taken Reports

For each observation, record action taken, owner and target closure date. ATR status is tracked centrally.

### 17.3 Closing Observations

Close observations only after compliance evidence is captured. Reviewer name and date are recorded.

### 17.4 Viewing Inspection History

Account 360 › Inspection tab shows the full inspection history for the account, with ATR status and next due date.

## 18. Reports

### 18.1 Available Reports

- Branch: Portfolio, SMA/NPA, Recovery, Inspection, Reminders, Daily Tasks.
- Regional: Branch Ranking, Heat Map Export, Regional Recovery, Escalations.
- Central: National Health, Sector Concentration, Geographic Exposure, Governance, ATR Monitoring.

### 18.2 Filters

Apply filters by region, branch, product, sector, period and risk band to scope the report.

### 18.3 Export Options

Reports export to Excel (.xlsx) using the inbuilt SheetJS engine. Exports carry the SPBANKLENS 360 watermark.

### 18.4 Printing Reports

Use the browser's Print to PDF for any report screen for offline reference. Avoid distribution outside authorised channels.

## 19. Search

### 19.1 Global Search

The global search bar in the top bar searches across accounts, customers, branches, officers and notebook keywords.

### 19.2 Advanced Filters

Within any module, use the Filters panel to combine attributes (e.g., product = MSME, SMA = 2, branch = X).

### 19.3 Search By

- Account number or CIF.
- Customer name.
- Branch code/name.
- Officer name.
- Notebook keyword.
- Task / case status.

**TIP** Type at least 3 characters to trigger global search results.

## 20. Administration

Administrator (Security) functions are restricted to the Admin role.

### 20.1 User Management

Create, deactivate and reassign users; map users to branches/regions.

### 20.2 Role Management

Assign roles (Branch Officer, Branch Manager, Regional, Central, Admin) and govern role-based permissions.

### 20.3 Configuration

Configure risk thresholds, EWS rule weights, SLA windows, escalation matrix and reminder windows.

### 20.4 Audit Logs

Review the read-only audit trail — every metadata change, notebook entry, escalation, approval and configuration change is logged with user, timestamp and before/after values.

### 20.5 System Settings

Branding, holiday calendar, working hours and dashboard auto-refresh intervals.

## 21. Troubleshooting

| Issue           | What to do                                                                                                                     |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------|
| Login Problems  | Confirm role tile, User ID and password. If still failing, contact Administrator. Do not retry repeatedly — lockout may apply. |
| Missing Data    | Verify the latest upload date on the Data Integration Hub. Refresh after the next upload cycle. If persistent, raise a ticket. |
| Upload Errors   | Review validation messages on the Hub. Check mandatory columns, data types and date formats. Correct and re-upload.            |
| Search Issues   | Type at least 3 characters. Clear filters that may be hiding results. Try the module's local filter panel.                     |
| Access Denied   | Your role does not have permission for that module/action. Contact the Administrator if you believe this is an error.          |
| Session Timeout | Re-login. Sessions are time-bound for security. Work in progress in forms not saved will be lost.                              |

## 22. Frequently Asked Questions (FAQ)

### **Q1. Will SPBANKLENS 360 post to CBS?**

No. It is a read-only intelligence platform. All transactions remain on CBS/LOS.

### **Q2. Can I edit a Knowledge Notebook entry?**

No. Notebook entries are immutable. Add a new versioned entry; full history is retained.

### **Q3. Why do dashboard numbers differ from CBS?**

Dashboards reflect the most recent upload. Check the Hub's last-uploaded timestamp.

### **Q4. What happens to my open tasks on transfer?**

They are bundled into a handover pack through Officer Continuity for the incoming officer.

### **Q5. Can I export to Excel?**

Yes. Most modules support watermarked Excel export.

### **Q6. Who configures thresholds?**

Only the Administrator role.

### **Q7. How are EWS scores explained?**

The Explainable Risk panel on Account 360 shows the contribution of each of the 13 rules.

### **Q8. Are my actions logged?**

Yes. All meaningful actions are recorded in the read-only audit trail.

## 23. Best Practices

- Review your dashboard at the start and end of every working day.
- Update the Knowledge Notebook immediately after every significant customer interaction.
- Complete pending tasks before due dates; do not let amber/red items persist.
- Verify uploaded files before processing — bad data cascades into KPIs and EWS.
- Monitor reminders and inspection observations regularly; clear due-today items by end of day.
- Use Officer Continuity for every officer transfer — never leave undocumented handovers.
- Write notebook entries as if the next officer is reading them — that is institutional memory.
- Escalate without delay through the matrix where compliance or recovery is at risk.

## 24. Glossary

| Term     | Definition                                                                                      |
|----------|-------------------------------------------------------------------------------------------------|
| ATR      | Action Taken Report on inspection/audit observations.                                           |
| CBS      | Core Banking System — the bank's transaction system.                                            |
| CGTMSE   | Credit Guarantee Fund Trust for Micro and Small Enterprises.                                    |
| CIF      | Customer Information File — unique customer identifier.                                         |
| DPD      | Days Past Due on instalments.                                                                   |
| DRT      | Debt Recovery Tribunal.                                                                         |
| EWS      | Early Warning System.                                                                           |
| KPI      | Key Performance Indicator.                                                                      |
| LOS      | Loan Origination System.                                                                        |
| MIS      | Management Information System.                                                                  |
| NPA      | Non-Performing Asset.                                                                           |
| PTP      | Promise to Pay.                                                                                 |
| RBAC     | Role-Based Access Control.                                                                      |
| RBIA     | Risk-Based Internal Audit.                                                                      |
| SARFAESI | Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act. |
