1. Purpose

SPBANKLENS 360 is an enterprise-grade Risk Intelligence and Operations layer that consolidates information from the Core Banking System (CBS), Loan Origination System (LOS), legal registers, inspection trackers and ancillary banking platforms into a single role-aware operational view. It is a read-only intelligence platform — it does not initiate banking transactions.

The purpose of this Standard Operating Procedure (SOP) is to provide Branch, Regional and Central Office users, together with platform administrators, with a single authoritative reference describing how to use SPBANKLENS 360 for day-to-day operations, supervisory monitoring, recovery, compliance and executive oversight.

This SOP defines the standardised steps, controls and escalation paths that govern operational use of the platform, and is intended to support user training, onboarding, audit readiness and continuity of operations during officer transfers.

2. Scope

This SOP covers operational use of SPBANKLENS 360 across all implemented modules in Version 1.0. It applies to all officers and supervisors using the platform at Branch, Regional Office and Central Office levels, as well as to the Security/Administrator role.

In Scope

- Role-based login, navigation and session management.
- Branch Dashboard and operational KPI review.
- Account 360° deep-dive and customer-level review.
- Knowledge Notebook 2.0 (Operational Memory Layer) and Officer Continuity.
- Workflow Centre, task assignment, follow-up and escalation.
- Reminder Engine, dashboard alerts and email automation (simulated).
- Recovery, NPA Lifecycle, Legal Register and CGTMSE modules.
- Inspection & Audit tracking and Action Taken Reports (ATR).
- Regional supervisory monitoring, heat maps and comparisons.
- Central Office Executive Command Centre, governance and risk oversight.
- Reports, exports and operational MIS.

Out of Scope

- Transactional posting to CBS or LOS.
- Customer-facing channels (internet banking, mobile banking).
- Statutory regulatory submissions (system supports preparation, not filing).

3. Roles & Responsibilities

SPBANKLENS 360 enforces Role-Based Access Control (RBAC). Each role has a dedicated dashboard and a controlled set of operational responsibilities.

Role	Primary Responsibilities	Key Modules
Branch Officer	Day-to-day loan monitoring, customer interaction logging, recovery follow-up, task completion, notebook updates.	Branch Dashboard, Account 360, Knowledge Notebook, Workflow Centre, Recovery.
Branch Manager	Supervisory review of branch portfolio, approval of escalations, officer handover oversight, branch-level compliance.	Branch Dashboard, Manager Workbench, Officer Continuity, Inspection.
Regional Office	Supervisory monitoring of branches under the region, branch ranking, escalation tracking, inspection follow-up.	Regional Dashboard, Heat Map, Branch Comparison, Follow-up Tracker.
Central Office	Enterprise-wide oversight, governance, policy compliance, executive dashboards, exception management.	Executive Command Centre, Risk Intelligence, Governance, War Room.
Administrator (Security)	User and role administration, threshold and SLA configuration, audit trail review.	Admin Console, Audit Trail, Risk Thresholds.

4. Login Procedure

4.1 Login

1. Open the SPBANKLENS 360 application URL in a supported browser.
2. On the Landing Page, select your role (Branch, Regional, Central or Admin).
3. Enter the user identifier and password on the role-specific Login Page.
4. Click Sign In. On success, the user is routed to the role-specific dashboard.

[Screenshot placeholder: Landing Page – role selection]

4.2 Session Handling

- Sessions are maintained via server-side encrypted httpOnly cookies.
- Sessions are bound to a single role; switching roles requires logout and re-login.
- Inactive sessions are subject to timeout and require re-authentication.

4.3 Logout

5. Click the user profile icon in the top bar.
6. Select Logout. The session cookie is invalidated server-side and the user returns to the Landing Page.

4.4 Password Management (Prototype)

In Version 1.0, demonstration credentials are provided on the Login page for evaluation. In production deployment, passwords will be governed by the bank's enterprise identity provider (AD/LDAP/SSO) with mandatory password complexity, expiry and lockout policies.

5. Branch Operations SOP

The Branch Dashboard is the operational home screen for Branch Officers and Branch Managers. It consolidates portfolio KPIs, the Risk Health Index, daily tasks, EWS alerts and shortcuts to Account 360 and Knowledge Notebook.

5.1 Dashboard Review (Daily, at start of day)

7. Log in as Branch Officer/Manager.
8. Review the 16 KPI tiles: total accounts, sanctioned vs. outstanding, overdue, SMA buckets, NPA, recovery, CGTMSE coverage.
9. Inspect the Risk Health Index gauge and the portfolio trend chart.
10. Open the 'Today's Tasks' panel and confirm the day's work queue.

5.2 Portfolio Monitoring

11. Navigate to Branch > Portfolio.
12. Filter by product, sector, SMA bucket or risk band.
13. Drill into any account row to open Account 360.

5.3 Opening Account 360

14. Use the global search bar or click an account in any list.
15. Account 360 opens with Customer, Loan, Documents, Risk, Inspection, Recovery and Legal tabs.

5.4 Updating the Knowledge Notebook

16. On Account 360, click 'Add Note' or use the global Quick Note dialog.
17. Select the relevant Notebook section (Inspection, Customer Interaction, Recovery, Document, Legal, etc.).
18. Enter observations, attach files where applicable, and save. The entry is versioned and immutable.

5.5 Managing Workflows

19. Navigate to Workflow Centre > Officer Work Queue.
20. Pick up tasks, update status (In Progress / Completed) and add remarks.
21. Escalate to manager where SLA risk is detected.

5.6 Reviewing Reminders

- Check the Reminder Engine panel for due-date alerts (review, inspection, renewal, legal).
- Action all overdue reminders before end of day.

5.7 Uploading Operational Files

22. Navigate to the Data Integration Hub (where authorised).

23. Select the template (Loan Master, SMA, Inspection, Recovery, Legal, CGTMSE).
24. Upload the Excel/CSV file. Validation results are displayed; correct errors and re-upload.

5.8 Reviewing Risk Indicators

- Open the EWS panel on the dashboard or Account 360.
- Review the 'Explainable Risk' panel to understand the rule contributions to each score.

6. Regional Office SOP

6.1 Monitoring Branch Performance

25. Log in as Regional User.
26. Open the Regional Dashboard. Review the Branch Risk Heat Map and the branch ranking table.
27. Identify branches in 'Red' or 'Amber' risk bands for priority follow-up.

6.2 Reviewing Pending Inspections

28. Navigate to Regional > Inspections.
29. Filter by branch, inspection type and due-date band.
30. Follow up with branches where inspection closure or ATR is overdue.

6.3 Monitoring Recovery

- Open Regional > Recovery to view region-wide recovery performance.
- Drill into branches with negative recovery variance.

6.4 Following Up on Compliance

31. Open the Follow-up & Escalation module.
32. Review open compliance items and reassign or escalate as needed.

6.5 Reviewing Branch Dashboards

Use the Branch Comparison tool to benchmark up to four branches across portfolio, risk, recovery and compliance KPIs.

6.6 Escalating Issues

33. Select the item to escalate.
34. Choose escalation level (Branch Manager → Regional Head → Central Office) per the configured escalation matrix.
35. Add a remark and submit. The escalation is recorded in the audit trail.

7. Central Office SOP

7.1 Portfolio Monitoring

Open the Executive Command Centre. Review the National Health Index, sector concentration and geographic exposure analytics.

7.2 Regional Comparisons

Use the Regional Comparison panel to benchmark region-level KPIs and identify outliers.

7.3 Governance Review

- Review the Governance Index and the ATR monitoring tracker.
- Ensure regulatory calendar items are on track.

7.4 Executive Dashboard Usage

36. Filter by region, period or product.
37. Drill from national → regional → branch → account level.

7.5 Risk Oversight

Open Risk Intelligence to review the rule-based engine, weighted risk scores and explainability for any account or portfolio.

7.6 Exception Management

38. Open the Exception Management module.
39. Review unresolved exceptions, assign owners and track closure SLAs.

8. Account 360 SOP

Account 360 is the single CRM-style screen consolidating all information for a loan/customer.

8.1 Searching an Account

40. Use the global search bar (account number, customer name or CIF).
41. Select the matching record to open Account 360.

8.2 Reviewing Customer Information

On the Customer tab, verify demographics, contact details, CIF linkage and KYC status.

8.3 Reviewing Loan Details

On the Loan tab, review sanctioned amount, outstanding, repayment schedule, interest, DPD and SMA classification.

8.4 Reviewing Documentation

On the Documents tab, confirm document presence, expiry and renewal status.

8.5 Reviewing Risk Indicators

Open the Risk tab. Review the risk dial, EWS triggers and the Explainable Risk panel.

8.6 Viewing Inspection History

On the Inspection tab, view all past inspections, observations, ATR status and next due date.

8.7 Reviewing Recovery History

On the Recovery tab, view follow-up history, Promise to Pay records and recovery outcomes.

8.8 Reviewing Legal Status

On the Legal tab, view notices issued, case status, next hearing date and milestones.

9. Knowledge Notebook SOP

The Knowledge Notebook 2.0 is the permanent Operational Memory Layer of the bank. All entries are versioned, attributed and immutable.

9.1 Creating Operational Notes

42. Open Account 360 or click 'Quick Note' from any account list.
43. Select one of the 10 structured sections.
44. Enter observations, save. The note is versioned with author, timestamp and account context.

9.2 Recording Inspection Visits

Use the Inspection section. Record date of visit, observations, photographs (if any) and follow-up actions.

9.3 Recording Customer Interactions

Use the Customer Interaction section to log calls, visits and meetings, with date, mode and outcome.

9.4 Recording Recovery Visits

Use the Recovery section. Capture visit outcome, Promise to Pay date/amount and next action.

9.5 Recording Documentation Updates

Use the Document section to log document renewals, insurance updates and missing documents.

9.6 Recording Legal Updates

Use the Legal section to record notices, hearings and case milestones.

9.7 Adding Attachments

Attach supporting evidence (photographs, scanned documents) where applicable. Attachments are bound to the note version.

9.8 Version History

All notes maintain a complete version history; superseded entries remain visible and auditable.

9.9 Officer Handover

45. Open Officer Continuity at branch or central level.

46. Generate a handover pack — the outgoing officer's notebook entries, open tasks and pending follow-ups are bundled for the incoming officer's acknowledgement.

10. Workflow Management SOP

10.1 Creating Tasks

Tasks may be created (a) automatically by the Task Generation Engine in response to EWS triggers, or (b) manually by officers/managers from Account 360 or the Workflow Centre.

10.2 Assigning Tasks

47. Open the task. Select assignee from the eligible role pool.
48. Set priority and due date (within configured SLA).

10.3 Completing Tasks

49. Assignee opens the task from Officer Work Queue.
50. Updates status, adds remarks and any required notebook entry.
51. Marks task as Completed.

10.4 Closing Tasks

Branch Manager reviews completed tasks in the Manager Workbench and Closes them. Closed tasks are immutable.

10.5 Escalating Overdue Tasks

Tasks breaching SLA are escalated automatically as per the Escalation Matrix (Officer → Manager → Regional → Central) and surface on the recipient's dashboard and Workflow Centre.

11. Reminder & Notification SOP

11.1 Dashboard Alerts

All due and overdue items are surfaced on the role dashboard via the Reminder Engine panel. Dashboards auto-refresh at configured intervals.

11.2 Email Reminders

The Email Automation simulator dispatches reminder emails for due tasks, inspection due-dates, document expiries, recovery follow-ups and CGTMSE renewals.

11.3 Escalation Process

Items not actioned within the reminder window are escalated per the matrix; escalations are visible in the Follow-up Tracker.

11.4 Due-date Monitoring

- Officers must clear all 'Due Today' items by end of day.
- Overdue items must be cleared or formally re-scheduled within 24 hours.

12. Recovery SOP

12.1 Follow-up

- 52. Open Recovery module or Account 360 › Recovery tab.
- 53. Identify accounts due for follow-up.
- 54. Initiate contact (call/visit) and record outcome in the Knowledge Notebook Recovery section.

12.2 Promise to Pay (PTP)

- 55. Record PTP amount, date and mode in the Recovery tab.
- 56. System creates an automatic reminder for the PTP date.

12.3 Recovery Visits

Capture visit date, location, persons met, observations and next steps. Attach evidence where required.

12.4 Recording Outcomes

Update outcome: Paid (full/partial), PTP, No Contact, Refused, Legal Action Required.

12.5 Closing Recovery Actions

On successful recovery or transition to legal action, close the active recovery item; the audit trail and notebook history remain available.

13. NPA SOP

The NPA Lifecycle Management module tracks accounts through SMA-0, SMA-1, SMA-2, Sub-Standard, Doubtful and Loss classifications.

57. Open NPA module from Branch/Regional/Central navigation.
58. Review the NPA ageing summary and slippage analysis.
59. Drill into any account to view slippage history, provisioning view, recovery actions, legal status and CGTMSE coverage.
60. Record monthly NPA review observations in the Knowledge Notebook.
61. Track upgradation, write-off or recovery actions until closure.

14. Legal SOP

14.1 Notices

Record all notices (Demand Notice, SARFAESI 13(2)/13(4), DRT, etc.) with date, mode and acknowledgement status.

14.2 Legal Case Tracking

For each case, capture forum, case number, advocate, filing date, current status and next hearing.

14.3 Hearing Updates

After every hearing, update outcome and next hearing date in the Legal Register; mirror critical observations to the Knowledge Notebook.

14.4 Legal Milestones

Track milestones — possession, auction, decree, recovery certificate — until disposal. All updates are versioned and audit-trailed.

15. CGTMSE SOP

15.1 Registration Monitoring

Review CGTMSE coverage status for all eligible accounts. Identify accounts pending registration.

15.2 Claim Tracking

For invoked accounts, track claim filing, claim ID, claim amount, current status and settlement.

15.3 Renewal Monitoring

Monitor annual guarantee fee due dates. The Reminder Engine surfaces upcoming renewals on the dashboard.

15.4 Escalation

Lapsed coverage or delayed claims are escalated per the matrix and tracked to closure in the Follow-up Tracker.

16. Inspection SOP

16.1 Recording Inspections

- 62. Open Inspection module.
- 63. Select inspection type (Statutory, Internal, Concurrent, RBIA, Stock Audit).
- 64. Record date, scope, observations, risk rating and attach the inspection report.

16.2 Action Taken Reports (ATR)

For each observation, record action taken, owner and target closure date. ATR status is tracked centrally.

16.3 Closure Process

Observations are closed only after compliance evidence is captured. Closure is recorded with reviewer name and date.

16.4 Follow-up

Open observations beyond target date are surfaced to the Branch Manager, Regional Office and (if persistent) Central Office.

17. Reports SOP

17.1 Generating Reports

65. Open the Reports / MIS module relevant to the role.
66. Select the report template.

17.2 Applying Filters

Apply filters — region, branch, product, sector, period, risk band — to scope the report.

17.3 Exporting Reports

Export to Excel (.xlsx) using the inbuilt SheetJS export. All exports carry the SPBANKLENS 360 watermark and developer credit.

17.4 Scheduling Reports

Recurring reports may be scheduled (prototype simulation) for periodic generation and email delivery.

18. Security SOP

18.1 Role-Based Access

Access is strictly governed by RBAC. Users see only the modules, dashboards and data permitted by their role.

18.2 User Responsibilities

- Do not share credentials.
- Lock the workstation when unattended.
- Report suspected unauthorised access immediately.

18.3 Data Confidentiality

All customer and portfolio data is classified Internal Use and must not be exported, screenshotted or shared outside authorised channels.

18.4 Audit Trail

All metadata changes, notebook entries, escalations and approvals are recorded in a read-only audit trail accessible to the Administrator.

18.5 Session Management

Sessions use server-side encrypted httpOnly cookies. Inactive sessions are terminated; concurrent logins are governed by policy.

19. Exception Handling

Exception	Procedure
Missing Data	Verify source upload completeness. Re-upload the corrected template via the Data Integration Hub. Record the incident in the Knowledge Notebook.
Upload Failures	Review validation errors shown by the Hub. Correct the file (mandatory columns, data types, dates). Retry upload.
Workflow Exceptions	If a task cannot be completed, mark with reason code and escalate via the Workflow Centre.
Access Issues	Contact the Administrator. Do not attempt to use another user's credentials.
Validation Errors	Review the error message. Correct the underlying data and resubmit. Persistent errors are logged for the Administrator.

20. Best Practices

- Update the Knowledge Notebook immediately after every customer interaction.
- Review pending tasks and reminders at the start and end of each working day.
- Close completed workflows promptly to keep the work queue accurate.
- Verify uploaded data before processing — incorrect uploads cascade into KPIs and EWS.
- Monitor dashboard alerts regularly; do not let red indicators persist.
- Escalate overdue compliance items without delay, per the escalation matrix.
- Always perform formal handover via the Officer Continuity module on transfer.
- Treat the Knowledge Notebook as institutional memory — write for the next officer.

21. Frequently Asked Questions (FAQ)

Q1. Does SPBANKLENS 360 post transactions to CBS?

No. SPBANKLENS 360 is a read-only intelligence platform. It consolidates and analyses data from source systems; all transactions remain on CBS/LOS.

Q2. Can I edit a Knowledge Notebook entry after saving?

Notebook entries are immutable. You may add a new versioned entry that supersedes the previous one; the full history remains visible.

Q3. Why do my dashboard numbers differ from CBS?

Dashboard figures reflect the most recent upload via the Data Integration Hub. Verify the upload date/time on the Hub; refresh after the next upload cycle.

Q4. What happens to my open tasks when I am transferred?

Open tasks and pending follow-ups are transferred to the incoming officer through the Officer Continuity handover pack.

Q5. Can I export data to Excel?

Yes. Most modules support Excel export with the SPBANKLENS 360 watermark applied to every export.

Q6. Who can configure risk thresholds and SLAs?

Only the Administrator (Security role) can configure risk thresholds, escalation SLAs and reminder windows.

Q7. How are EWS scores calculated?

EWS scores are derived from a Rule-Based Risk Engine of 13 weighted rules. The Explainable Risk panel on Account 360 shows the contribution of each rule to the score.

22. Glossary

Term	Definition
ATR	Action Taken Report — response to inspection/audit observations.
CBS	Core Banking System — the bank's primary transaction system.
CGTMSE	Credit Guarantee Fund Trust for Micro and Small Enterprises.
CIF	Customer Information File — unique customer identifier.
DPD	Days Past Due — number of days an instalment is overdue.
DRT	Debt Recovery Tribunal.
EWS	Early Warning System.
KPI	Key Performance Indicator.
LOS	Loan Origination System.
NPA	Non-Performing Asset.
PTP	Promise to Pay.
RBAC	Role-Based Access Control.
RBIA	Risk-Based Internal Audit.
SARFAESI	Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act.
SLA	Service Level Agreement.
SMA	Special Mention Account — pre-NPA stress classification.
SOP	Standard Operating Procedure.
